

Specially designed strip enables to achieve uniform backlighting, especially effective for creating of light modules and luminous lamps.

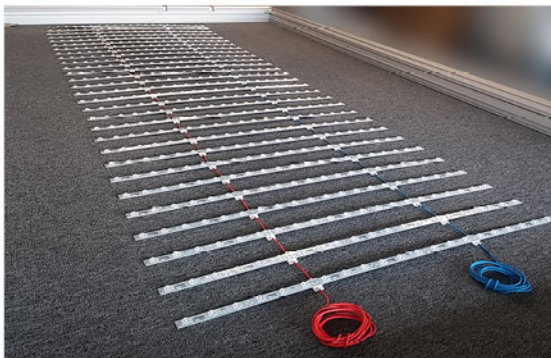

Lenght of the strip 980mm, white light classification – 6500K, output power 6,7W/unit, luminous flux 1050 LM/unit with dimmable function.

LR25 (LED strip + 2 plastic clips)

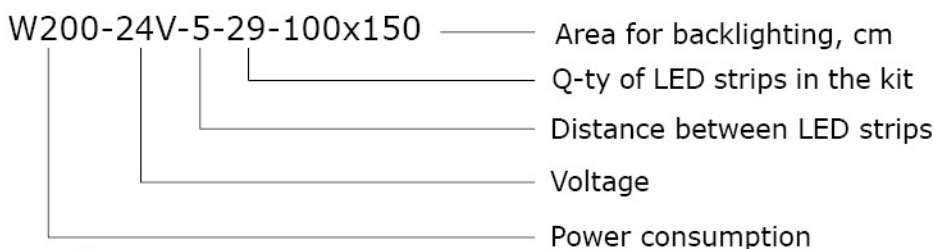

Can be purchased as individually as also in following kits: (power supply is not included to the kit)

LR26	W200-24V-5-29-100x150
LR27	W300-24V-5-44-100x220
LR28	W200-24V-10-29-100x300
LR29	W300-24V-10-44-100x440
LR30	W200-24V-12-29-100x350
LR31	W300-24V-12-44-100x530
LR32	W200-24V-15-29-100x440
LR33	W300-24V-15-44-100x660

How to read article code?

You can find all technical information from the code of the article, for example:

All leds strips have parallel connection which allows to achieve the same lighting of all strips.
